Great game that takes me back years ago when I completed it for the first time. Try it.. Unfortunately, despite pouring over the forums scattered throughout the internet and implementing an assortment of recommended fixes, I have been unable to get a cursor for my mouse to appear. The one exception was when I changed the game to run in a tiny window, I got the cursor, but the game was practically unplayable. Unless you are prepared to fight hard to get the game kind of playable, I would strongly recommend skipping this.
